

AAON Responds to Pandemic Request

To our valued customers -,

GBS makes it a priority to provide access to state-of-the-art equipment from trusted manufacturers such as AAON.

AAON has committed to and remains available to assist with Emergency Infrastructure needs related to the national response to COVID-19. They are offering expedited manufacturing and shipment of equipment for facilities requiring emergency response due the current pandemic. Additionally, they are offering this at standard pricing (no premiums) for applicable facilities.

AAON's Unprecedented Response

In response to the US Army Corps of Engineers last week, AAON is manufacturing and shipping (44) Forty-four 50-Ton units to Stony Brook Medical Center in NY. This will total 2,200 tons of cooling, custom configured units and purpose built for the hospital ***within a 10 day period from first phone call to shipment.***

Pandemic Related Requests

If you are aware of or are involved with any facilities that need a response of this type, please contact us immediately. Please understand that the facility must be directly responding to the COVID-19 pandemic, and that the response time noted in the above case may not available in all situations.

GBS Continues to Service Customers

GBS and AAON have a longstanding relationship that has spanned a quarter century. We will remain committed to upholding our relationships with top notch manufacturers that enable us to provide the custom, end-to-end solutions you need today and in the future.

Please let us know how best to continue servicing your company.

Stay safe and healthy,
The Team at GBS
